

## **Petition for the Installation of a Water Filter in Our Residential Building**

To the property management of the building [Name of the building] / [Address],

We, the tenants of the building [Name of the building], would like to submit this collective request for the installation of a water filter in our building.

Installing a water filter would ensure access to high-quality drinking water while significantly reducing our dependence on plastic bottles. By adopting this solution, we would not only have direct access to clean, healthy water, but we would also contribute to environmental preservation by minimizing the purchase and use of plastic bottles. This initiative would be a step toward more responsible resource and waste management, promoting a more sustainable living environment in our building.

We are confident that installing this system would benefit both the quality of life for residents and contribute positively to environmental sustainability. Therefore, we kindly ask you to consider this request and take the necessary steps for the installation of a water filter in our building as soon as possible.

We thank you in advance for your attention to this matter and are available for any further information or clarification.

Hoping for a favorable response,

[Name(s) of the tenants signing]

[Apartment number(s)]
