Our Goals

- To make our websites a **global reference** for responsible consumption and the regulation of human activities with a high impact on **greenhouse gas (GHG) emissions**.
- To support and promote **genuinely committed initiatives** for environmental preservation.

Areas of Focus

The platform is structured around two main sections to facilitate access to information:

1. **Solutions**
Lists concrete practices and solutions for individuals, businesses, and governments to combat climate change.
2. **Act**
Provides tools, products, and action-oriented resources for an effective ecological transition.

User Experience

The site offers three display modes for optimal navigation:

- **Global View:** Ranked by relevance, considering GHG reduction impact, support, and proactive collaboration.
- **Thematic View:** Categorized by theme to simplify browsing.
- **Index View:** Comprehensive alphabetical listing of all content.

Support Needed

Your support is essential!

Record ocean temperatures in 2023 and 2024 highlight the **urgency of taking action** on climate change. ASE is seeking donations to support:

1. **Finalization and optimization of the website:**
 - Research and publication of new solutions.
 - Improved interface and user features.
 - Recruitment of human and material resources.
2. **Development of a mobile application:**
 - Easy access to the platform, anytime and anywhere.
3. **Promotion and awareness campaigns:**
 - Stronger social media presence.
 - Public awareness and outreach campaigns.
4. **Additional projects:**
 - Campaigns against paper-based advertising pollution.
 - Carbon capture initiatives with partner associations.
 - Development of related platforms focused on responsible consumption.
